Verse 1:

We keep it going all through the night, they work us all day and it just ain't right  
Bossman treats us like a modern day slave, always wants more despite what we  
gave  
But we're together and to each is their own, it feels so good when you're in the  
zone

Chorus:

We're taking it over cause this is our town, we'll crumble it up and burn it on down  
You can't stop us best leave us alone, the music's on now so make it your own

Verse 2:

Back with a vengeance and newfound energy, United in our love and one  
philosophy,  
The chains that bound us lie broken on the floor, we form our own bonds that last  
forever more  
Keeping faith is the goal of the saga, no matter were we turn we always keep it  
Rasta

Chorus2

We're taking it over cause this is our town, we'll crumble it up and burn it on down  
You can't stop us best leave us alone, the music's on now so make it your own

Bridge:

Here we go now, where you coming from X2

Hear them rising now, iya man now

Straight to the belly of the beast called Babylon,  
Ripping down the walls to reveal true Zion  
Rustle up the junta and send them marching on

We place our faith before their brawn, and start a new dawn  
Sing our inner song, till our last breath is gone

They all fall trembling from a mighty earthquake  
They're all washed clean from the red flood gates

Searching for signs from the African masta  
We'll never be wrong as long as we keep it Rasta

Verse3:

Hour by hour it all becomes clear, we're learning the purpose of why we are here.  
It's not possessions or anything you got, the dots will connect if you see it or not  
Follow your heart and keep a smile on your face, brush off needless worry and  
keep your own pace

Outro over chorus section:

We got just one shot so make sure you live, lay it all out till there's nothing left to  
give  
Take a deep breath and soon you'll find, there's nothing to fear cause it's all in  
your mind
